Battery Technology

- Hybrid Power
- Lithium-ion Power
- Interchangeable battery system

A new found freedom in lawn care

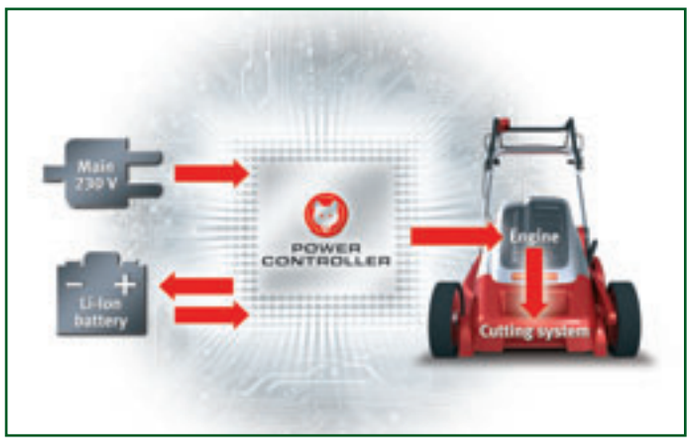
Take a step towards a Hybrid Future with WOLF-Garten and offer your customers this new, patented range of Hybrid Power lawn mowers. The Hybrid Power range of mowers combines the freedom of lithium-ion batteries with the performance of mains power to offer garden-lovers the ultimate flexibility when maintaining their lawns.

HYBRID POWER®

A World First in lawn mower technology

Hybrid Power 46

Thanks to its patented combination of battery and mains technology, the new Hybrid Power mowers boast the capacity to cope with medium and even larger sized lawns and offer the flexibility of a battery-driven operation for those awkward to get to areas that a cable won't reach. These powerful machines make for ideal, low-noise, no mess, low-polluting alternatives to petrol mowers and help to encourage responsible gardening.



Built-in intelligence

The unique Hybrid Power technology is built around our customers' needs for safety assurance and user-friendly features. A patented, internal control chip- the Power Controller- regulates the following aspects of the machine reliably and intelligently:

- Motor control
- Motor soft start
- Motor rotation stability
- Automatic switch from mains to battery operation
- Temperature monitoring and blocking protection
- Fast battery recharging technology
- Filling level control and indication

Our customers benefit from the high efficiency, safety and user-friendliness of the Hybrid Power range. You, the retailer, will benefit from the high margins that they provide, as well as the interest that this World First innovation will generate.

Technology simplified

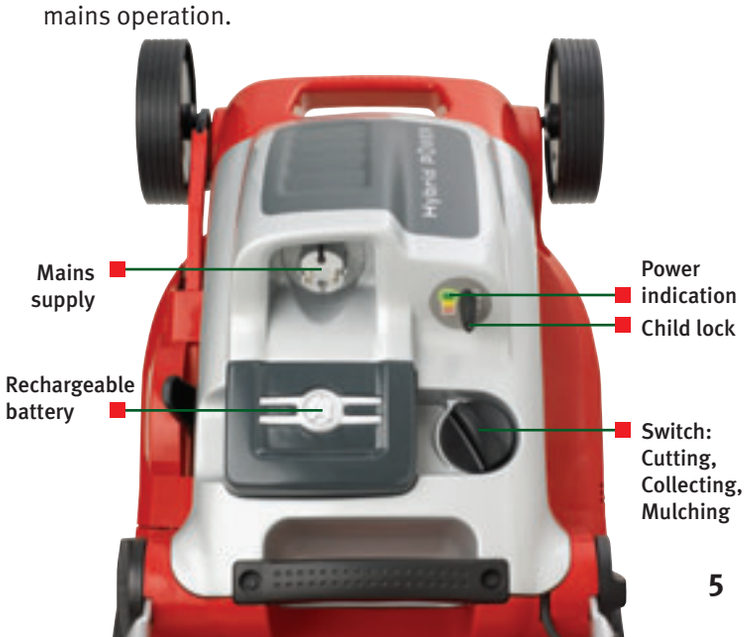
Until now gardeners have had to struggle to get to awkward areas of their lawn, especially in instances where the cable gets tangled around garden features, trees or shrubs. In other cases, where there is a large stretch of lawn with limited or inconveniently placed power points, the cable often fails to reach to the edges of the lawn. The WOLF-Garten Hybrid Power range offers the solution to these common gardening problems.

Advantages at a glance:

- powerful and built to last
- practical and versatile
- environmental-friendly and extremely quiet in operation
- extremely economical operating costs
- highly efficient - up to 300m² cutting area per battery charge
- battery charges in only 1.5 hours
- includes external quick charger
- battery automatically recharges while machine is in mains operation
- ready to perform, anytime, anywhere thanks to modern lithium-ion, rechargeable battery technology

* WOLF-Garten is the first German manufacturer to launch a lawn mower that combines battery and mains power in one machine

When used in battery operation, the machines are lightweight, manoeuvrable and practical and by simply inserting the cable, the Hybrid Power automatically converts to a mains-driven operation. When used with a cable, the mowers make use of their high power reserves that facilitate quiet yet powerful cutting, even on larger areas of lawn and on long, overgrown grass. Furthermore, the lithium-ion battery charges automatically whilst the machine is in mains operation.



Systematic gardening thanks to interchangeable battery technology

New

Lithium-ion battery technology has already been integrated into many aspects of everyday life. Tooth-brushes, power tools, shavers and, more recently, cars have all been modified to incorporate this state of the art, environmentally friendly power source. WOLF-Garten is ready to apply this very same Li-Ion technology to all aspects of garden care, ready for a greener 2008 gardening season.
An intelligent grouping of products makes for a product family with an interchangeable battery system- for practicality in use for the customer, and an increase in linked sales opportunities for you, the retailer.
The new battery-operated product family consists of:

- Hybrid Power lawn mower with 37, 40 and 46cm cutting widths. (Li-Ion Power Pack 1)
- Li-Ion Power battery mower with 34cm cutting width (Li-Ion Power Pack 2)
- Li-Ion Power battery lawn trimmer GT815AC - Trimming and edging in one machine (Li-Ion Power Pack 3)
- Li-Ion Power battery hedge shears: HSA- the best selling hedge shears throughout Europe and the only shears on the market with a 180 degree rotating blade head for protective and effort-saving cutting (Li-Ion Power Pack 3)
- Li-Ion Power battery grass shears with 75, 100 and 125 minutes operating time.
- Li-Ion Power battery hedge shears with 180 degree rotating blade head.

Supplementary

- Three Li-Ion Power rechargeable batteries. Pack 1 (3 x 36V), Pack 2 (24V) and Pack 3 (18V).
- Li-Ion Power quick battery charger- suitable for all Li-Ion Power Packs for a practically unlimited performance.

Battery-mower
34 Li-Ion Power

LI-ION POWER

The small, practical runabout

Mowing has never been so easy! WOLF-Garten's Li-Ion battery lawn mower is a lightweight and easily manoeuvrable machine that allows for a powerful and precise cutting performance for anything up to 300m² of lawn area with no cable, oil or petrol.

Battery technology - advantages at a glance:

The interchangeable lithium-ion battery system is lightweight, environmentally and user-friendly.

Features:

- No memory effect
- Hardly any self-discharge
- Low energy costs
- Less pollution

As a result of the interchangeable battery system, all products in the Li-Ion Power line boast a practically unlimited operating time. The battery can be easily changed and the fast battery charger makes for an ever-ready and reliable machine.
A further advantage of the system: one battery pack is suitable for different tools and applications.

The importance of presentation

WOLF-Garten will present an all-new look for the packaging and Point Of Sale of the lithium-ion battery product group. An eye-catching, modern and informative POS design reflects the high quality of this particular product group and a clear communication of the features, benefits and unique selling points of each product makes the buying decision even easier for our customers

HYBRID POWER®
LI-ION POWER®

The centre of attention!

As a World First in lawn mower technology, the new Hybrid Power range of mowers is sure to generate interest throughout the whole of Europe.
As part of a 2008 marketing campaign, WOLF-Garten will be sure to generate interest in this patented innovation by:

- Carrying out training days to ensure that your staff have sufficient information to make confident and informed sales
- Providing stores with POS material and leaflets as sales aids.
- Placing printed advertisements in special-interest titles.
- Developing PR activities
- Updating and developing our online presence.

10 Year Guarantee

On multi-change® tools, multi-change® tree care, forks, spades, other hand tools, loppers, secateurs, manual hedge shears, grass shears (apart from wearing parts).

Small but highly effective

New

It's all about good handling

After years of research into different types of garden shoppers, WOLF-Garten is familiar with its primary user groups. Keen, enthusiastic horticulturalists and the mature gardener with time to devote to the garden form more than two thirds of the overall market for garden tools and are exactly the right candidates for our superior quality products.

With these groups in mind, we have improved the technology and design of our small tool handles. Our new, three zone handles offer the best possible control, power and comfort, whilst allowing work without strain or painful pressure points.

Our new premium hand tools range consists of the following:
- Hand trowel
- Scraper
- Weeding and planting knife
- Double hoe
- Small sweep
- Hand grubber

Comfortable grip thanks to smooth shape and soft zones

Finger contours for extra hand protection

Large surface area on handle end for extra power with maximum comfort

The multi-change® system

A unique addition to your gardening range

For more than 25 years, our patented snap-lock system has been inspiring gardeners all over the world. The easy-to-use 'click' mechanism allows for a variety of different tool heads to be used with just one handle. Economical, amazingly simple and of the highest quality, this 'Every Head Fits Every Handle' range is sure to increase your sales.

A striking presentation to increase your sales

WOLF-Garten understands that when customers are searching for a gardening solution, they want to find it, fast!
Our multi-change tool display incorporates the three most important steps that simplify the purchasing decision for our customers:

Step 1: Subject area- information banners and POS guide your customers to the subject area that they are working on; Lawn Care, Soil Care, Tree Care.

Step 2: The correct product- our Fact Tags display the correct product information for each tool

Step 3: The decision is in the detail- our range of leaflets and catalogues offer product details as well as handy hints and tips that can help to increase linked sales.

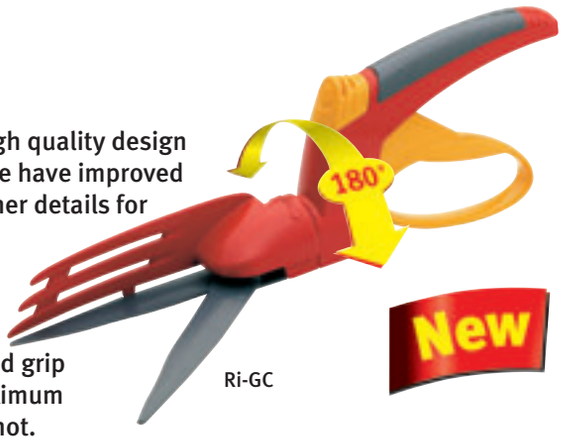
- Loppers
- Secateurs
- Manual hedge shears
- Manual grass shears

Trimming solutions for every type of gardener and every type of garden

Effortless Cutting

Our shears have long been recognised for their high quality design and excellent cutting performance, but for 2008 we have improved them even further. We have incorporated some finer details for a more comfortable cut that takes gardening into the next generation. Our 2008 range of grass shears offers the solution to a multitude of trimming problems; a rotating blade head has been integrated as standard, as has a comfort hand grip and a user-friendly lock mechanism to ensure maximum cutting reach when in use and safe storage when not.



Ri-GC

Ri-LL Comfort:
- More comfort at the lawn edge
- 30% less effort thanks to non- stick, non-friction coated blades
- Comfort grip and hand protection
- 180° rotating blade head

RJ-ZL Classic:
- glossy galvanised blade
- 180° rotatable blade head

Collector Grass Shears Ri-GC:
A brand new look with attention to the finest detail
- A grass clippings collector shield to prevent clippings from falling into neighbouring flowerbeds.
- 30% less effort thanks to non-stick, non-friction coated blades
- Waved blade, handle protection and comfort grip
- 180 degree rotating blade head

Perfect for the summer garden

In response to the recent trend towards Grow Your Own gardening, WOLF-Garten is proud to present the new RA-XS Herb Scissors. With short blades for a precise cutting action and a comfortable handle that fits snugly into the hand, these scissors are perfect for those customers with small kitchen gardens.

A whole bunch of possibilities

The new RA-80 shears from WOLF-Garten are ideal for the delicate pruning of flowers and vines. With an extra long (80 mm) blade and a robust tip for more cutting security, the RA-80 reaches in amongst flowers for a perfect and precise cut every time.

A matter of confidence

There is no better sales argument than the guarantee of high quality and exceptional performance.
Every shear in the WOLF-Garten range promises:

- **Lasting performance due to the high quality of the raw materials and German manufacturing**
- **Easy-cut, easy-clean blades due to non-stick coating**
- **Tried and tested cutting action due to years of re-search**
- **Comfortable handling due to carefully designed ergonomics.**

Tailor-made for your customers

With a long history of supplying precision cutting tools to the market, we have a good understanding of what is important to our customers.

High quality, sharp steel is essential for the perfect cut, but comfort and ease of use is also high on the list of garden-lovers' demands.

Our comfort secateurs have precision-ground blades for precise pruning and are customised and contoured to fit comfortably into different hand sizes, allowing the tool to be held securely and cuts to be made accurately with the minimum of force.

Lawn Mowers

- Electric mowers
- Battery mowers
- Hybrid mowers
- Petrol mowers
- Power Edition

The market leader’s story of success

50 years ago, Wolf-Garten introduced the very first electric lawn mower to Europe and with good reason it has remained the number one best seller throughout this time.

When it comes to innovation and leaps in technology, Wolf-Garten leads the way. Continuing with this tradition, in 2008 we will launch a new era of mower technology when we will present our unique, World First, Hybrid Power lawnmower.

This new machine will combine the advantages of battery and mains power in one piece of equipment - the proven power of electric cable and the eco-friendliness of modern rechargeable batteries.

- environmentally friendly, lithium-ion battery technology: no pollutants, no oil, no petrol and no exhaust gas
- particularly user-friendly: 15% more lightweight and more manoeuvrable than petrol-mowers
- extremely low noise, powerful and built to last
- ergonomically designed and easy to operate
- practically unlimited operating time thanks to the WOLF-Garten rechargeable battery system and external quick charger

Power and freedom in one machine: HYBRID POWER

As of April 2008, The Hybrid Power range of mowers will be available in three cutting widths: 37, 40 and 46 cm. The unique hybrid combination of battery and electric technology will offer garden enthusiasts an all new freedom when mowing their lawns: freedom of movement and practicality in battery operation, power reserves and unlimited performance in mains operation.

Bringing the pleasure back to garden maintenance: LI-ION POWER

Our new Li-Ion Power battery lawn mower is lightweight, easy to manoeuvre and environmentally friendly. Furthermore, this highly modern machine is powerful enough to cut up to 300m² of lawn per battery charge.

Top Scorer

More and more consumers are opting to buy Wolf-Garten electric lawnmowers due to the endorsement of a variety of international institutions voting them Best in Test, year after year.

Wolf-Garten mowers are high scoring because of their reliability, user-friendly handling, safety and overall performance backed up by our careful testing and tight quality assurance policy.

Always First!

When it comes to electric lawn-mowers, WOLF-Garten has been first class since 1958:

- In 1958 WOLF-Garten introduced the very first electric lawnmower in Europe!
- For 50 years, WOLF-Garten has been the number 1 selling European brand in the lawnmower market!
- In 2008, WOLF-Garten presents a world-first range of Hybrid lawn mowers
- WOLF-Garten is the first manufacturer to offer a 10 year guarantee on all electric, Hybrid Power and Li-ion Power lawn-mowers!

10 year guarantee on all WOLF-Garten electric, Hybrid Power and Li-ion Power lawn-mowers (except wearing parts and Campus 320E).

Dedicated to development

Following our success in the European lawn mower market and years of research into the needs of our customers, we would like to present a comprehensive range of electric, battery and Hybrid Power lawn mowers for the 2008 gardening season, all of which are sealed with the quality assurance of a ten year guarantee.

Brimming with confidence

WOLF-Garten is the first and only manufacturer to offer a 10 year guarantee on all of our electric, battery and Hybrid Power lawn mowers. Based upon sound market research, 62% of people surveyed expressed the opinion that the duration of the guarantee was an important aspect when considering the purchase of a mower.

We will provide you with POS and packaging that highlights our 10 year guarantee on all electric, Hybrid Power and battery lawn mowers to allow you to use it as a unique selling tool.

Vario drive

Mowing at your own speed

The Vario drive allows you to control the speed at which you mow - from 2.5 - 5km/h. All Assist Power Edition mowers are equipped with with this function.
(except - steel chassis models)

Triplex-System®

For efficient mowing

Our patented Triplex System® guarantees a 100% fill of the collection bag everytime - even in instances where the lawn is wet, extremely dry or overgrown. Grass clippings are sucked into the bag by air circulation caused by rotating blades.

Exclusive and convincing – the WOLF-Garten Power Edition

After 3 years of success and a variety of international awards for quality and performance, we have decided to develop and improve our Compact Plus range of mowers with the introduction of the Compact Plus Power Edition assortment. This new and improved range combines the Cut, Collect, Mulch facility of the Compact Plus mowers with an increase in power and an attractive new look for the 2008 gardening season.

Power Edition

Power Edition Compact Plus 40E

Cut, Collect, Mulch!

The range boasts the CCM (Cut, Collect, Mulch) facility which allows firstly for a high quality cut and secondly, for consumers to deposit the nutrients found in the cut grass clippings back into their lawn thus encouraging healthy re-growth in an eco-friendly manner- all in one machine. The improved range has been named Compact Plus Power Edition as a result of the increase in engine power (200 watts more powerful then the standard Compact Plus range), which ensures a perfect cut every time. These low-noise, no-mess machines offer a powerful cutting performance that is gentle on the environment at the same time.

Power Edition 46 HA

POWERED by HONDA

Powerful, low-maintenance and environmentally-friendly

Our Compact Plus Power Edition petrol mowers are powered by the latest Honda OHC engines for an outstanding performance on every cut. With a low-noise operation and economical petrol consumption that is way below the required environmental standards, these machines are extremely efficient, cost effective and more gentle on the environment compared to other petrol mowers on the market.

Lawn care

- Scarifiers
- Trimmers
- Spreaders
- Hose Trolleys
- Shredder

With a 4-way adjustable working angle, problematic areas are reached quickly and effectively

The plant protection bracket avoids damaging of plants during trimming

Telescopic handle with second adjustable hand grip for ergonomic working

The wheel carriage allows the exact cutting height to be obtained by means of its variable height adjustment.

Making professional technology available to the enthusiast

For decades, WOLF-Garten has been the market leader in the European scarifier market.
To celebrate our success, we are making this tried and tested scarifier technology available to any type of gardener, from the garden enthusiast to the professional gardener.
A rotating cylinder with double-edged blades allows for a gentle yet intensive scarifying result and a folding handlebar makes for space-saving storage and easy transportation.

An entry-level price to encourage first-time buyers

Our new entry-level scarifier will encourage first-time buyers to take the next step in caring for their lawns. The Campus Scarifier 300V has a central height adjustment and an optional grass collector to meet all the needs of the garden enthusiast!

Unbeatable trimming technology

Our Li-Ion Power battery lawn trimmer, GT 815 AC, is lightweight, powerful and boasts all of the features of our new, interchangeable battery system. Its battery can also be used with our Li-Ion Power battery hedge shears and with a quick charge time, it is ready for use in no time.

The details at a glance:
- Mobile trimming and edging in one machine
- Line adjustment with automatic tip mechanism
- Telescopic handle, adjustable middle grip and blade head
- Plant protection bracket prevents damage to neighbouring plants
